

In May, 2018, Lilly Deutschland GmbH, discovered that the "Description of the nature of the support" provided to Germany-based patient organization throughout 2017 was mistakenly captured in the original published report, thus the original disclosed data was not entirely accurate and complete. The previously inaccurate descriptions are now reflected in this amended report, which replaces the original report.

Eli Lilly and Company's disclosure of its support to patient organizations is one of the activities undertaken by the Company to improve transparency concerning Company dealings with third parties. Most of the data had to be compiled manually across a number of legal entities and countries. Eli Lilly and Company herein declares that the Company has made its best efforts to make a comprehensive disclosure of concerned activities.
